To Assemble: Cut out each topper using the thin grey line as a guide. Carefully fold it in half right on the dotted line and crease well. Hold tightly and cut around the design, leaving about 1/8" of white around the art. Apply glue (glue stick or whatever you have) to back side of one half of the topper. Put a toothpick about a quarter of an inch into the bottom of the topper; add a bit more glue to the toothpick. Carefully matching edges, firmly press the two pieces of topper together securing the toothpick between them. Allow to dry before topping your cupcakes. ❤ SB
